PRIMARY EXAMINER

REASONS FOR ALLOWANCE

Applicant's responses of 6/7/06 including arguments drawn to the rejections of claims 25-34 and the terminal disclaimer of 6/16/06 have been received and considered. Applicant's arguments stated that there is no basis in fact or technical reasoning that suggests why Tackles '564 creates "negative air pressure immediately adjacent to said venting aperture, whereby air entering said eye cavity is pulled from said eye cavity by negative air pressure adjacent to said venting aperture", as claimed. Applicant further presents that Tackles teaches air flow coming in from vents 38, causing a circulation pattern leading to venting of air through openings 34, 36, thus rather than pulling air from the eye cavity via creating of negative air pressure, Tackles teaches pushing of air from the eye cavity via the creation of a circulation pattern. The Examiner agrees and the rejection of claims 25-24 is withdrawn.
